DETAILED ACTION

1. This is the first office action for serial number 10/657,855. This application contains 3 claims numbered 1-3. This Application is a continuation of SN: 09/436,363, which is now patented number 6,669,154.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 5 and 12 of U.S. Patent No. 6,669,154 to Remmers. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and the application are claiming common subject matter. It would have been obvious to one having ordinary skill in the art to make a shelving system and a method for supporting a shelf claimed in this application as explicitly taught by claims 1, 3, 5 and 12 of Patent 6, 669,154.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,638,644 to Bastian.

Bastian shows a wall support assembly (Figs. 1 and 3-6) comprising a track (12) having a support portion and a retaining lip (24), the support portion having upper support surface and lower surface; a standard (13, 14, 15) having a front surface defining a plurality of apertures (31) there through to receive a shelf bracket (Figs. 5-6), and a back surface opposite the front surface; the back surface defining an opening therein (see marked-up copy next page), the opening having an upper surface that contacts the upper support surface of the track; the front surface having a top portion that substantially contacts the retaining lip when the support portion is within the opening; and a shelf (S).

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,110,080 to Rieman.

Reiman discloses a holding strip for suspension bars comprising a track (7) having means (2) for supporting a standard (8); the standard having means (9) for receiving a shelf bracket; and a shelf (not shown) (see abstract).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bastian.

The reference to Bastian teaches the structures for supporting a shelf substantially as claimed as discussed above. The method of supporting a shelf as claimed in claim 3 would have been obvious in view of the structures.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6,69,154 to Remmers
